

Milano, 28 settembre 2021

Open lecture: **“How to avoid EQE traps in paper D”**

Venue: Politecnico di Milano, Dipartimento di Energia, Sala Consiglio, Via Lambruschini 4, Milano-Bovisa

**Friday 17 december 2021**

Time: **14:30 -17:45**

Lecturer: **Dott. Stéphane Speich**

The **University Politecnico di Milano** would like to invite you to an open lecture given by **Dr. Stéphane Speich**, National and European Patent Attorney, on the following topic.

### **Program**

The EQE may be tough also for those candidates who have brilliantly graduated from the University, and are capable of doing the work of patent attorney.

Passing the exam requires not only a theoretical preparation on the EPC, but also a specific training to the exam.

The lecture of Stéphane Speich aims at focussing the attention on those points which at the EQE may be most problematic, teaching how to avoid some of the typical mistakes which can be done during your preparation before the exam and at the exam.

30% of the candidates taking the EQE end up with marks comprised between 35 and 45 marks, including many who are well prepared. The problem for the well prepared people is a lack of methodology, they should:

- Develop and test their reading and writing speed
- Test how to find the information quickly

This course will try to help the candidates to the EQE paper D to improve their pass rate (50 marks).

The lecture will be in English and intends to be particularly helpful to those intending to sit the EQE exam in March 2022.

The lesson is free of charge.
