Titolo dell'incontro: "Opening lecture :Patent Rights and Modern Technology – What is the deal?"

Sede dell'incontro: Politecnico di Milano, Dipartimento di Energia, Via Lambruschini 4, Milano-Bovisa

Martedì 17 ottobre 2017

Ore 14:30 -17:00

Relatore : **Dott. Klaus Grabinski**

Programma

This talk will raise the question whether modern technology requires a new patent law. As a starting point it will go back to history in order to find out what have been the reasons to set up patent law systems. It will then turn to the current understanding of the nature of patents and raise the question whether modern technology and other current developments in the field of patent law require "a new deal". This will mainly be discussed with regard to four issues: New business models of patent holders, market situations and standards, complexity of the products and public interest. The talk will focus on how these issues have been tackled so far under patent law, general legal principles and competition law and where challenges may lie ahead.

Agenda dell'incontro

14.30 – 14.45 : Introduction to the topics
14.45 – 15.45 : New business models of patent holders, market situations and standards.
15.45 – 16.00: coffee break
16.00 – 17.30: Complexity of the products and public interest.
